PROFESSIONAL SUMMARY

SaaS Customer Support and Technical Operations Specialist with experience supporting high-volume digital platforms, resolving user and system issues, and maintaining structured CRM-based workflows in remote environments.

Experienced in real-time customer support across email, chat, and voice channels, with strong ability to troubleshoot platform issues, investigate system behavior, and ensure fast and accurate resolution of customer requests.

Skilled in SaaS-style support operations including ticketing systems, escalation handling, workflow management, CRM support, integration support, and cross-functional collaboration to maintain service reliability and customer satisfaction.

CORE SKILLS

- SaaS Customer Support across email, chat, and voice channels
- CRM Systems and Ticketing Workflows: Zendesk, Intercom, HubSpot, Salesforce
- Ticket Lifecycle Management, SLA Awareness, Escalation Handling, and Case Resolution
- Technical Troubleshooting, Root Cause Analysis, and Customer Issue Documentation
- CRM and Integration Support with foundational API, authentication, and request/response troubleshooting
- Postman for basic API testing and Chrome DevTools for web issue debugging
- Customer Onboarding, Workflow Support, Data Accuracy, Reporting, and Process Improvement
- Google Analytics 4, Google Tag Manager, Google Sheets, WordPress, Shopify, and Remote Support Operations
